

Free, Specialized Software.

Today's Review: **Screen Capture.**

Single Picture: Just press "Print Screen" key to copy screen to Clipboard.

Streaming Video Videos sent to you from a website; e.g. You Tube
I will discuss these in the future (if requested).

"Your actions" You can capture all your actions on the screen as a "movie" which you can replay. This is a great way to make a video on how to do something such as install a program or use a piece of software. I use my favorite program when I proctor exams to see what the user did and what the user's answers were. (*I obtain permission first, of course.*) There are many such programs. You can see a review of several programs at <http://www.isoftwarereviews.com/free-screen-recording-video-screen-capture-software/>. My favorite is BBFlashBackExpress. http://www.bbsoftware.co.uk/BBFlashBack_FreePlayer.aspx

Demonstration (at the October 10, 2011 meeting) (on-line below)
